Every Name Index to Portrait Photographs

The following portrait index is a merged listing of ten portrait format collections. They include daguerreotypes, ambrotypes, tintypes or ferrotypes, cartes-de-visite, cabinet cards, crayon or chromo portraits, prints, special processes (such as ivorytypes, etc) and the portrait file. These listings give access to photographic portraits made between 1840 and 1990. There are other sources for portraits in the CCHS collection that are not represented in this list. Ask a librarian or the photo archivist for further assistance if you do not find the name you are looking for here. Update: 12/29/2014
