History

Background Note on the collection creation:

This is an artificial collection created by the staff of the Chester County Historical Society as a quick access method of organizing portrait photographs. The collection also contains copy photographs of documents of interest to genealogists such as military discharges, indentures, marriage certificates, naturalization papers, land drafts and wills.

The photographs were originally organized in binders placed on open shelving in the reading room, interfiled with the genealogical books and materials. The photographs were removed from this area during the Photograph Cataloging Grant funded by Glenmeade Trust in 1986-1989 and were placed in closed stack storage in archival enclosures and containers. An inventory list with subject index was made at that time. This collection is still actively being added to and constantly updated. New guides are printed and published annually.

Collection Scope and Content Note:

This collection contains 4,496 albumen, silver gelatin, platinum, matte collodion, printing-out-paper, cyanotypes, salted paper, sepia toned, hand colored, or dye coupler photographs and half-tone prints spanning the period from about 1850 to the present. The

photographs were created by a variety of photographers, both professional and amateur from Chester County and beyond. The photographs measure 11 x 14 and smaller.

Arrangement

The Portrait File is alphabetical by surname. Portraits of individuals who share the same surname are placed in the file for that name; it does not imply a relationship between the individuals. Separate files have been created for individuals or family groups with a large number of images and are labeled as such. Cross references are provided to other folders where people appear with more than one surname in group photographs.

Access and Use

Access Restrictions:

None

Acquisition Information:

The photographs have been donated to CCHS since its founding in 1893 by a variety of donors. Donor names are identified on the photographs when known.

Preferred Citation:
